Components

Eurolot S.A.

Eurolot began its business activity in 1996, starting with scheduled flights for PLL LOT S.A., whilst its own air operations (known as K2 - 078) began in 2011.

The company's mission is to develop regional flights, connecting Polish cities with European destinations, and to create attractively priced, safe and up-to-date transport branch, which is competitive to other forms of communications on the Continent. Thanks to experience, qualified staff, advanced fleet and enthusiasm, Eurolot can achieve that goal very soon.

Quote

"Eurolot was looking for a reliable, cost-effective solution to be implemented in a very ambitious timeline. ISO met the requirements. Moreover, they provided us with a team of dedicated experts highly involved in the project who contributed to its successful accomplishment."

Jakub Szczepaniak,
Manager Reservation Systems & IT – Overall
Project Head for RA System Implementation

Needs

Eurolot needed a solution for

- reconciliation of own and interline sale for accounting purposes
- examining past documents sales-based on existing agreements to allocate revenue to routes and periods
- creating own reports using the integrated generator
- issuing and accepting invoices through SIS Platform
- gaining a high-quality solution for reasonable money

Solution

Eurolot chose ISO's highly automated SKYfly Revenue because it is an all-encompassing, web-based Revenue Accounting solution to accommodate all its needs.

Benefit

With SKYfly Revenue Eurolot gained sustainable advantages beyond the original needs

- the solution was easily implemented at Eurolot Headquarters with just a little training effort
- the online help provided is self-explanatory for most of the questions
- the high level of automation in feeding the system reduces workload and costs
- the system offers dynamic interfaces to accounting
- the responsiveness and flexibility of the ISO Team way above expectations

ISO Software Systeme

ISO Software Systeme has specialized in solutions specific for the aviation industry for more than 30 years. As a IATA Strategic Partner, ISO offers applications and services according to proven standards. Already more than 30 clients worldwide rely on quality software made in Germany.
