Security starts with clarity:

CyberRiskCheck

How well is your IT protected?

transparent – practical – certified

Leverage the power of structured security analyses to identify your IT risks in a targeted manner – efficiently, comprehensively, and actionably.

With the CyberRiskCheck according to DIN SPEC 27076, you receive a standard-based assessment of your IT security – specially developed for the requirements of small and medium-sized enterprises. As a trained partner of the German Federal Office for Information Security (BSI), the ISO Group helps you identify risks at an early stage and reveal vulnerabilities – as a basis for targeted measures to improve your security architecture.

From analysis to action:

Status check of your IT security
We analyze your IT infrastructure, including networks, systems, and applications.

Risk identification
Critical vulnerabilities are identified in order to determine where urgent action is required.

Results report
We deliver structured results as a basis for further security measures.

CyberRisiko Check

Your added security:

Complete transparency
You receive a structured overview of security-related areas of your IT – clear, comprehensible, and serving as a basis for further decisions.

Time and cost savings
The CyberRiskCheck is tailored to small and medium-sized enterprises – efficient, focused, and clear, so you can achieve maximum security with minimal effort.

More confidence in the market
With certified security standards, you strengthen the trust of your customers and business partners and demonstrate your professional IT security.

Why it's worth it:

Protection against cyber attacks
Reduce the risk of data loss and business downtime.

Meeting customer and compliance requirements
Demonstrate to customers, partners, and auditors that your IT security is systematic.

Financing and funding
Use the report as evidence for lenders or insurance companies. The CyberRiskCheck is also eligible for funding – please contact us for more information.

Competitive advantages
With certified IT security, you can strengthen your position in the market.
