IATA SIS-compliant solutions for Miscellaneous Invoices

powered by

DYNAMIC
Components

Why go for a change?

Miscellaneous Billing is one of the most troublesome and time-consuming processes in the aviation business. Simplified Interline Settlement (SIS) meant both: a chance and a challenge. Introducing structure into a so far unstructured process saves time and money, but raises many questions of how to keep pace with the progress.

SKYfly M-Billing Highlights

- scaleable – SKYfly M-Billing is as extensive as the needs, made to fit your volume and requirements
- SIS-compliant processing – IS-XML file handling and dynamic fields depending on Charge Categories & Charge Codes
- independent of existing IT architecture (integrated or stand-alone application)
- conversant & approved – ISO Software Systeme is the sole provider to offer proven solutions; more than 30 clients worldwide already rely on our aviation billing software made in Germany
- designed for airlines, airports and ground handling agents

Get your size

SKYfly M-Billing is designed for SIS-compliant invoicing between airlines as well as between suppliers and airlines. Even though everybody invoices similar services, the needs are different. On the strength of our past experience one size will not fit all – so pick the size that fits you:

S = M-Billing Basic

Easy capture of invoice data and generation of IS-XML file.

The simple solution for airlines with small M-Billing volume.

M = M-Billing Extended

The convenient way to handle inward and outward billing according to SIS standards – workflows and dynamic fields depending on Charge Category & Charge Code ensure easy processing.

This size can easily be extended to M-Billing Extended PLUS, which allows upload of billing data from other systems, for example in CSV format, and generates financial accounting data.

As the invoices could be created in a third-party system, this solution will also serve as a SIS adapter while leaving the existing processes unchanged.

The right size for most airlines – perfect for average M-Billing volume.

L = M-Billing Premium

This sophisticated solution creates invoices automatically based on comprehensive master data (for example tariffs and rules) and operational flight data. A powerful rule-based engine calculates the amounts through autopricing.

This size can easily be extended to M-Billing Premium PLUS, which supports you with an inward billing audit.

The right size for airlines with high invoice volume or even own ground service companies.

XL = M-Billing for SAP

Based on the proven and certified SAP add-on named SKY Billing, this solution offers full-size L functionality plus SAP SD integration.
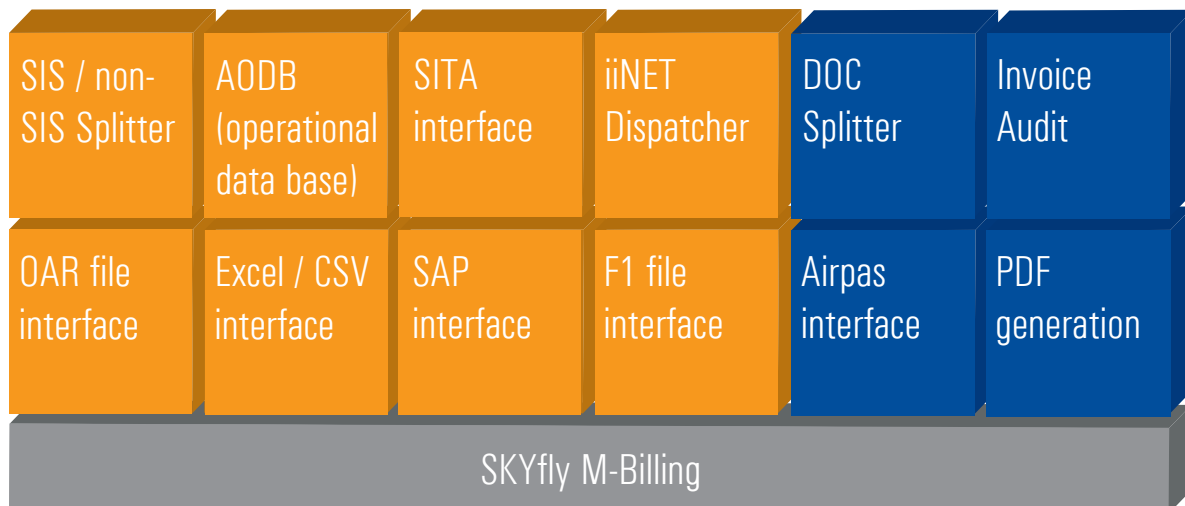

This option is ideal for an airline that already runs SAP.

Your Benefits

- significant decrease of working and shipping costs through paperless processing
- efficiency and time-saving with defined workflows
- transparency by assigning the supporting documents
- improved cash flow thanks to clearance through SIS
- easy implementation, easy handling

The construction kit principle – get what you really need

Based on the different sizes of SKYfly M-Billing, you may customize the solution by choosing from our broad range of add-ons.

SIS / non-SIS Splitter	AODB (operational data base)	SITA interface	iiNET Dispatcher	DOC Splitter	Invoice Audit
OAR file interface	Excel / CSV interface	SAP interface	F1 file interface	Airpas interface	PDF generation

SKYfly M-Billing

Quick start

We offer to start with a temporarily hosted solution at our data center. You do not need to set up your own environment to start right away. Migrating to your own premises can then be done unhurriedly at any later stage at your convenience.

Kick off → **SIS go live** with hosted environment → decide on next steps ⇢ process inhouse / continue as hosted solution

Month 1   Month 4   Month 10   Month 12

What can we do for you?

We get you going and support you with additional services such as

- gap analysis, requirement determination, specification
- implementation services
- training
- sandbox & SIS certification testing
- go-live support

Get it going

You only need to take a few steps to run your Miscellaneous Billing at SIS successfully. Remember your ABCs...

Analyze   how you are currently doing it

Benchmark   what is the right solution for your company

Choose   which components you need

Decide   later, whether to run it in house or as a hosted solution

Don't hesitate, get it going, start now!
