Portfolio Data Quality Management

Master data is a valuable asset for companies – because added value depends on reliable and consistent information based on efficient master data management. Many companies try to achieve high-quality master data. Some individual measures are taken, for example data analysis, enrichment or duplicate checking. In most cases, however, companies underestimate the complexity of the process, with responsibilities unassigned and no overall strategy.

As a specialist in Data Quality Management, we have been providing an ever growing portfolio of SAP® add-ons since early 2000. And as a certified SAP Partner, we offer services and consulting along the entire life cycle of master data.

Our services are not limited to SAP ERP and CRM systems – we also offer a diverse portfolio of technology for integration with your system landscape. This includes rich clients, cloud solutions and sever solutions. The products of ISO Professional Services are decisive in a successful master data strategy – transparent and sustainable.

Our experience

More than 80 000 clients use and trust our solutions in more than 450 installations (SAP ERP, SAP CRM, S/4HANA, C4C HYBRIS).

Intuitive interfaces in familiar surroundings ensure rapid acceptance with our international user clientele.

Master Data Management and Master Data Governance are focal points in the varying scenarios we offer, for example master data for clients, suppliers, material or G/L accounts.
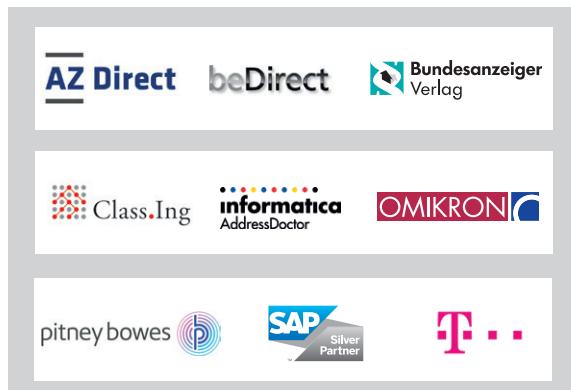

We support numerous clients successfully across several SAP and non-SAP systems with a structured creation process of master data and maintenance services.

Our specialized team is solely in charge of product development and maintenance of our Data Management solutions. We are proud of a very low employee fluctuation rate.

Incorporating best practice appropriations, we have created more than 25 ready-to-run SAP add-ons with their own customizing options. This is how we achieve excellent results in a manageable project time frame. Our solutions are modular, require no modifications and can be used locally as well as globally.

Our partners

The number of our data quality partner rises steadily. Most of them provide content for supplementing or enriching master data. We integrate their content into SAP by exporting from their web services:

Our consulting and services

Our References

Numerous multinational corporations from a range of industries trust our solutions:

Data Quality Products

Marlin Suite – integrated add-ons for SAP

- **Master Data Governance**
Transactional creation and maintenance processes for customer | supplier | material master | SAP Business Partner | bank master | general ledger accounts | master data management with local and central field information across systems | analysis feature

- **Duplicate Master Data**
Duplicate checking in customer, supplier and material master, both via user interface and batch task | feature for copying missing data to a "golden record" and displaying the use across all organizational units

- **Address Validation**
International postal correction of address data in the user interface and via batch task plus enrichment with geo coordinates

- **Fault-tolerant search help**
Field accurate/cross-field SAP F4-search featuring user scenarios for material master, customers, suppliers and master data documents

- **Legal Entity Audit**
Validates, compares and enriches business addresses with information in user interface and backlog | a broad variety of field content e.g. parent company, tax ID, company ID, company name, content ID, VAT ID etc.

- **VAT ID Check**
Validation of VAT IDs for Germany, Austria and Europe both via interface and batch task

- **Compliance Check**
Sanction list, PeP list, embargo and boycott list matching for customer, supplier, staff, banks or material master data both via interface and in the back log

- **Master Data Migration**
Read data via a migration program with an included duplicate check application, data preparation via clearing and revision displays

Scarus Suite – Data Quality Technology

- **Data Quality Server - intelliSearch Server**
A central DQ server with interfaces to connect to a heterogeneous system landscape | fully integrated in the ready system for SAP systems from the Marlin product suite | offers data quality services such as duplicate checking, address validation, data preparation, rule violation recognition

- **Rich Client Version**
Processing of various data sources on a desktop PC using several DQ tools

- **OEM integration**
In form of a native library, we are able to integrate our DQ services with your software

Facts & figures

- founding year: 1979
- owner-managed, family-owned enterprise
- turnover in 2019: 70 million Euro
- about 610 employees
- headquarters: Nuremberg

About ISO Professional Services

The ISO Professional Services GmbH has decades of experience in SAP consulting and hosting as well as IT infrastructure services. The core competencies span the entire life cycle of SAP and non-SAP landscapes – from consulting, implementation and operation to optimization. Operations can include all aspects: from selective remote operating to managed services to full outsourcing. We have special know-how in the fields of Data Quality Management of large datasets, Data Governance and Data Integration in the context of Industry 4.0. Currently more than 80,000 SAP users on some 450 SAP installations use our modular solutions to increase the quality of their master data in SAP. SAP hosting as well as several products for Data Quality Management are certified by SAP SE.

ISO has been active in the market since 1979 and has since developed into a versatile, international IT service provider. Targeting specific markets has resulted in several powerful and innovative companies under the umbrella of the ISO-Gruppe. Besides ISO Professional Services the ISO-Gruppe today includes ISO Software Systems (specialized in software engineering and IT consulting), ISO Travel

Solutions (an IT expert for the tourism industry), and ISO Recruiting Consultants (a provider of IT personnel services).

In 2016 and 2019, ISO-Gruppe was voted a TOP 100 Company in Germany. This award underscores the remarkably innovative capacity and exceptional inventive success of medium-sized enterprises in Germany.

Some 610 permanent employees work at several sites throughout Germany as well as in associate companies in Austria, Poland and Canada. The companies ISO Software Systeme, ISO Travel Solutions and ISO Professional Services of the ISO-Gruppe, with their respective offices in Nuremberg, Munich and Frankfurt, are certified to the requirements of their quality management system in accordance with DIN EN ISO 9001:2015.
