

# NIS2 Readiness Workshop

Is your IT secure?

## What is NIS2?

**NIS2 (Network and Information Systems Directive) is an updated EU directive. It aims to strengthen security in defined sectors and protect the digital infrastructure from increasing threats. This new directive expands the scope and sets higher security standards for a larger number of companies and organizations. Affected companies must ensure that their IT infrastructures are robust and resistant to cyber attacks.**

The NIS2 Directive goes beyond the previous definition of critical infrastructures under the KRITIS legislation and affects a broader range of companies. Many companies are therefore faced with the challenge of understanding and implementing the requirements of the NIS2 Directive. Uncertainty about whether you are affected and how best to prepare can lead to uncertainty and delays. This is where our NIS2 Readiness Workshop comes in.

### Our NIS2 Readiness Workshop

The customized NIS2 Readiness Workshop supports you in analyzing your current security status and identifying gaps (GAPs).

The NIS2 Readiness Workshop helps you to understand the requirements of the NIS2 directive and to optimize your IT security. Within just three days, you will receive a comprehensive overview of your security status as well as clear and actionable recommendations.

## Your advantages at a glance

### Status overview

Get a clear and concise overview of your current status in relation to the NIS2 directive.

### Recommendations for action

Prioritized recommendations show you exactly what you should do next - both to meet NIS2 requirements and to improve your overall IT security.

### Independent advice

Our advice is independent of products and manufacturers, so that you always receive the best solutions for your company.

## Workshop contents

### Introduction to the new NIS2 directive

Do you understand the requirements and their impact on your company?

### Advice and discussion

Gain valuable insights and recommendations on technical and organizational measures.

### Discussion of a NIS2 questionnaire

We analyze your current measures in detail and identify key issues.

### Results report

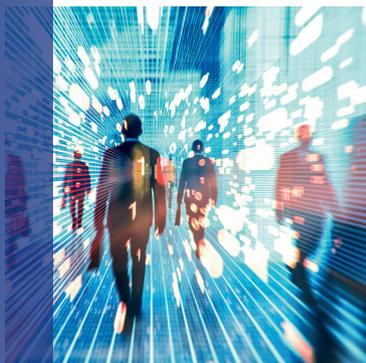

We create a comprehensive report that identifies your current GAPS and offers concrete recommendations for action.
